EDUCATION

University of Pittsburgh

08/2023 – 04/2027

BS Computer Science, Minors in Information Science and Music

Pittsburgh, PA

GPA: 3.84/4.0

Awards: Dean's List: Fall 2025, Spring 2025, Fall 2024, Spring 2024, Fall 2023

Coursework: Data Structures and Algorithms I and II, Intro to Software Engineering, Software Quality Assurance

Organizations: Community Officer (St. Baldrick's Foundation at Pitt), Computer Science Club, Ski Club, Skate Club

PROFESSIONAL EXPERIENCE

Simulator Software Engineer Intern

05/2025 – 08/2025

Vistra

Beaver Valley, PA

- Developed a user login system for the company's internal Software Work Request (SWR) form database using VBA and SQL, enabling user-specific change tracking and introducing several new quality-of-life features.
- Assisted in identifying and troubleshooting hardware and software integration issues within the simulator room, enhancing reliability of custom-built analog input systems.
- Converted 3D image models across platforms using modeling software, ensuring tool compatibility and accuracy.

PROJECTS

Paceify - Pitt SteelHacks XII (React, Node.js, Spotify Web API) 🔗

- Built a full-stack application in a 24-hour hackathon that generates personalized running playlists by mapping user pace and stride metrics to BPM-matched tracks.
- Integrated Spotify OAuth 2.0 and Spotify Web API endpoints to securely access user data and dynamically assemble tempo-optimized playlists.

Personal Website (HTML/CSS/JavaScript) 🔗

- Developed a personal website to showcase my portfolio and skills.
- Implemented interactive features, ensured cross-browser compatibility, and optimized for performance and user experience.

Unreal Engine First Person Shooter Game (Blueprint) 🔗

- Developed a first-person shooter game in Unreal Engine 5 where players must locate and destroy targets within a time limit to win.
- Utilized Blueprint visual scripting to design game mechanics, User Interface elements, and asset integration.

Data-Driven Survival Metrics for Neighborhoods (Python, Pandas, GeoPandas) 🔗

- Accessed public datasets to calculate which Pittsburgh neighborhood is most likely to survive an apocalypse
- Set metrics and drew statistical conclusions using pandas and data visualization.

SKILLS

Languages

Java, Python, HTML/CSS/JavaScript, React, MIPS Assembly, C, VBA, SQL

Libraries

Pandas, GeoPandas, Matplotlib

Game Engines

Unreal Engine 5 with Blueprint
