EDUCATION

University of Pittsburgh

Bachelor of Science in Computer Science, Minors in Information Science and Music

Pittsburgh, PA

Aug. 2023 – May 2027

- **GPA:** 3.86/4.0
- **Awards:** Dean's List: Spring 2026, Fall 2025, Spring 2025, Fall 2024, Spring 2024, Fall 2023
- **Coursework:** Intro to AI, Intro to SWE, Data Structure and Algorithms II, Software Quality Assurance, Intro to Web Development
- **Organizations:** Community Officer (St. Baldrick's Foundation at Pitt), Computer Science Club, Ski Club, Skate Club, Pitt Tonight

PROFESSIONAL EXPERIENCE

Cencora

Visualization Intern

Conshohocken, PA

June 2026 – Present

- Developed and maintained automated UI test cases for ARGUS Warehouse Automation platform using JavaScript and Microsoft Playwright.
- Expanded Playwright testing framework to support JSON-based configurations, enabling reusable test cases and improving test scalability and efficiency.
- Helped develop a GitHub Actions and Jira automation workflow that triggered test execution on a self-hosted Linux server.

Vistra

Simulator Software Engineer Intern

Beaver Valley, PA

May 2025 – Aug. 2025

- Developed a user login system for the company's internal Software Work Request (SWR) form database using VBA and SQL, enabling user-specific change tracking and introducing several new quality-of-life features.
- Assisted in identifying and troubleshooting hardware and software integration issues within the simulator room, enhancing reliability of custom-built analog input systems.
- Converted 3D image models across platforms using modeling software, ensuring tool compatibility and accuracy.

PROJECTS

InvestNest | *React, TypeScript, Node.js, SQL*

- Developed a Node.js/Express backend for a full-stack personal finance application on Render, supporting a React/TypeScript frontend and PostgreSQL database.
- Implemented backend uptime monitoring with UptimeRobot to maintain application availability, while collaborating within a six-person development team using a modern full-stack architecture.

Paceify – Pitt SteelHacks XII | *React, Node.js, Spotify Web API*

- Built a full-stack application in a 24-hour hackathon that generates personalized running playlists by mapping user pace and stride metrics to BPM-matched tracks.
- Integrated Spotify OAuth 2.0 and Spotify Web API endpoints to securely access user data and dynamically assemble tempo-optimized playlists.

Unreal Engine First Person Shooter Game | *Blueprint*

- Developed a first-person shooter game in Unreal Engine 5 where players must locate and destroy targets within a time limit to win.
- Utilized Blueprint visual scripting to design game mechanics, User Interface elements, and asset integration.

Personal Website | *HTML/CSS/JavaScript*

- Developed a personal website to showcase my portfolio and skills.

TECHNICAL SKILLS

Languages: Java, Python, HTML/CSS/JavaScript, MIPS Assembly, C, VBA, SQL

Frameworks/Libraries: React, Node.js, Express.js, Playwright, Selenium, Vite

Tools / Platforms: Git, GitHub, GitHub Actions, Jira, Linux, PostgreSQL, Render, Vercel, Ignition, UptimeRobot
